

Old North Abbey
Maintenance/Upgrade Task Pull Sheet

Brief Description:

Install new exterior lights outside in front of sanctuary

Antecedent Tasks:

None

Detailed Description:

This task has two parts: 1) install two new exterior lights for the sign; and 2) install new lights on the two posts by the front sidewalk. Russ Moorman should oversee this task, as he has the necessary electrical expertise to ensure it is done correctly and safely.

1) There is already electricity run underground from the church building to a junction box at the sign. This task will require the following: a) moving the mulch out of the way, and digging shallow trenches from the box to where the lights will be mounted; b) conduit run from the box and underground to the lights; c) mounting lights; d) wiring run in the conduits; e) wiring connected in junction box and at lights; f) general cleanup (fill and pack trenches, seed and cover disturbed grassed surface area and mulch. I believe that the lights for this have already been purchased.

2) Not clear what needs to be done here; Russ will need to add the details

Project Coordinator (who check in with to take on task):

Russ Moorman

Tools & Materials Needed:

Gray ¾" conduit and connectors as needed
PVC conduit cement
Exterior grade wiring and wire connectors
Wiring tools (cutter, stripper, tester, etc.)
Shovels, mattock, garden rake, etc. for digging and filling trenches
Grass seed and cover material (can buy as mix)
Perhaps need to still purchase exterior lights for on posts?

Support Contact/s (for materials and tools):

Russ & Daniel

Estimated Time Required:

6-8 hours

Personnel Requirement:

2-3, with Russ as lead

Target Completion Date:

June 2018

Date Task Created:

2018-01-06

Task Created By:

Daniel Yoder

Extra Hints / Comments:

Though this Task Sheet was created by Daniel, Russ really needs to be the lead on this
